

**Designation of  
Public Rights-of-Way  
to The Tidal Areas of The State**

**PROGRESS REPORT FOR**

**July 2021 through June 2022**

Submitted by

**THE COASTAL RESOURCES MANAGEMENT COUNCIL  
Subcommittee on Rights-of-Ways**

**As Amended JUNE 2022**

**CRMC Progress Report on Public Rights-of-Way Designations**

**July 2021 through June 2022**

**SUMMARY**

During the report period of July 1, 2021 through June 30, 2022 and in accordance with its legislative mandate at RIGL 46-23-17, the Coastal Resources Management Council (CRMC) has continued to address the discovery and designation of public rights-of-ways to the tidal areas of the state.

The General Assembly has mandated the CRMC with the continuing task of discovering and designating public rights-of-ways to the shore. In response CRMC established the Rights-of-Way (ROW) Subcommittee in 1978.

Any decision resulting in a public right-of-way designation by the Council is permanently recorded with the Secretary of State. The cumulative efforts of the CRMC and its ROW subcommittee are as follows. Please note that the potential ROWs listed in this report are compiled in an appendix. They are subject to legal review by CRMC counsel should new information be discovered that might change their current status. Any changes in the status of these potential ROWs will be reflected in subsequent CRMC annual ROW reports.

Total Number of Potential ROWs Reviewed:	353
Sites Designated as Public ROWs:	234
Sites with Insufficient Evidence for Designation:	67
Sites that are Not Resolved:	33
Sites Under Review:	22
*Sites that are On Appeal:	0

*\*Sites that are on Appeal are not included in the Total Number of Potential ROWs Reviewed*

**GOAL**

The goal of the CRMC is to designate at least one (1) public right-of-way for each mile of shoreline. With 234 sites designated as public, and with 420 miles of Rhode Island shoreline, the CRMC is better than half-way to reaching its goal.

**ACTIVITIES OF THE CRMC**

Significant previous accomplishments and new activities conducted during this report period by the CRMC staff and ROW Subcommittee follow:

- 1) Five (5) ROW Subcommittee meeting were held during the report period, July 1, 2021-June 30, 2022, during which an updated set of potential ROWs that had been received from various municipalities and reviewed by staff was submitted for consideration. These potential ROWs include Cory’s Lane, East Power Street, Beach Street at Cedar Avenue, Fountain Avenue, and Cedar Avenue (Portsmouth), and Water’s Edge Road, and the Spring Avenue Extension. Of these the Subcommittee held public hearings to

consider the Portsmouth Rights of Way. Each of these Rights of Ways that were heard in public hearings have been officially established and are included in this report.

2) The CRMC and the RI Attorney General's Office continue to implement a Memorandum in support of a ROW Protection Initiative to memorialize a partnership by which each agency agrees to coordinate and support their common interest in preserving shoreline public access at CRMC designated ROWs. A key element of this Initiative is the establishment of a two-tiered approach to enforcing RIGL 46-23-7.4 *Penalty for blocking or posting of rights-of-way* which provides penalties of up to a fine not exceeding \$500 dollars or imprisonment for not more than three months or both. As such, should a party served a Notice of Violation by CRMC Enforcement staff relative to RIGL 46-23-7.4 fail to respond within a given timeframe, the RI Attorney General's office will notify said party that it may take an action against them in Superior Court without further notice for their failure to correct the obstruction.

3) During this report period, the CRMC designated five new rights-of-way in Portsmouth. At its September 27 meeting, the Council adopted the Beach Street at Cedar Avenue, Cedar Avenue, Fountain Avenue, East Power Street, and Cory's Lane ROWs. With the designation as a CRMC ROW, these spots will be offered an additional layer of protection so they are preserved and protected as shoreline public access spots for the public to use in perpetuity.

4) The CRMC, alongside the Attorney General's office and the City of Newport, reached a preliminary agreement to restore access to the previously obstructed Right-of-Way on Lee's Wharf in downtown Newport. This determination, signed in early October of 2021, will reestablish public access to the Lee's Wharf right-of-way and provide site improvements to the area for the public to enjoy. This restoration of access is the result of a partnership between the CRMC, Rhode Island Attorney General's Office and Save the Bay, who established a right-of-way initiative to clear obstructions within CRMC-designated right-of-ways across the state.

5) The CRMC is continuing its review of five potential ROWs located in the Buttonwoods Fire District in the City of Warwick; this research was conducted and submitted by Mr. Richard Langseth, a fire district resident. In addition to Mr. Langseth's contention that Andrew Comstock Road and Buttonwoods Avenue are potential ROWs, which the Subcommittee is currently reviewing (see item #1 above), he further continues to contend that Promenade Avenue, Claflin Road, and Lorna Avenue have been accepted by the City of Warwick as public ways that lead to the shore, making them candidates for designation by the CRMC.

6) In June of 2022, the CRMC applied for a \$206,300 grant from the National Oceanic and Atmospheric Administration (NOAA) to work to improve equitable shoreline access in Rhode Island and help foster partnerships and collaboration to further Right of Way identification and designation. This project application includes Rhode Island Sea Grant, the Narragansett Bay National Estuarine Research Reserve and social and environmental science consulting non-profit firm Impact by Design. The CRMC and its partners plan to conduct a needs assessment, led by Impact by Design, to gather information and listen to a wide array of citizens, coastal residents and visitors about the real needs and wants for shoreline public access in their communities. This work will be followed by a stakeholder process, with the long-term goal of developing a five-year management plan to address these issues and implement solutions.

7) The CRMC continues its partnership with Save The Bay and the Coastal Institute to update the CRMC's ArcGIS Online ROW map. CRMC staff photographed every ROW as part of this project, and they are available to STB as they contribute toward updating the map. Former CRMC Coastal Geologist Janet Freedman and Coastal Institute Assistant Director Nate Vinhateiro have contributed integral map updates

## CRMC Progress Report on Right-of-Ways to the Tidal Areas of the State

for the effort. The ArcGIS Online ROW map can be accessed via the following link: <http://www.crmc.ri.gov/maps.html>

8) The CRMC continues its cooperative program with the municipalities to accelerate the discovery process of potential rights-of-way to the shore through the Harbor Management Planning process. The proposed ROWs mentioned above in the Towns of North Kingstown, Portsmouth, and Warren were all identified via this process.

9) During this report period, the CRMC designated a new right-of-way in Providence on Public Street. At its July 27, 2021 Meeting, the council adopted the Public Street Right of Way. With the designation as a CRMC ROW, this spot will be offered an additional layer of protection so it is preserved and protected as a shoreline public access spot for the public to use in perpetuity.

10) The CRMC has created numerous public access opportunities via assent stipulations under section 1.3.6 “Protection and enhancement of public access to the shore” (formerly § 335) of the RI Coastal Resources Management Program regulations. Section 1.3.6 stipulates that a public access plan must be prepared when the following activities are proposed: 1) Commercial and industrial development and redevelopment projects as defined in section 1.3.1 (C) “Residential, commercial, industrial, and recreational structures”; 2) New and significant expansions to marinas as defined in section 1.3.1 (D) “Recreational Boating Facilities”; and, 3) Activities which involve the filling of tidal waters as defined in section 1.3.1 (J) “Filling in tidal waters”), other than those considered as maintenance as defined in section 1.3.1 (G) “Construction of shoreline protection facilities”. The following cumulative list (as shown in the table on page 5) includes various types of public access created under section 1.3.6 such as boardwalks, parking facilities, shoreline access paths, and others:

11) The CRMC has established an Adopt-An-Access Program by which public/private partnerships preserve, protect, and enhance public access at CRMC ROWs. The Program is implemented via MOUs that stipulate each partner's role and responsibilities. The CRMC is a committed partner with Clean Ocean Access which adopted six ROWs in the Town of Middletown during the report period 2017-18. Whether officially adopted or not COA monitors every ROW on Aquidneck Island and hopes to adopt the ROW at Marine Avenue (Z-24) in Newport which was designated after every other ROW in the City had been adopted by COA. There are 43 adopted ROWs in the state as shown in the table below, with ROW C-3 recently added through a memorandum-of-understanding with the Narragansett Town Council's Coastal Access Improvement Committee signed in June of 2022.

**(See table on following page)**

**12)** Although the following activity did not occur during the report period, it is included due to its significance regarding public access to the shore at Misquamicut Beach in the Town of Westerly. In the RI Supreme Court case “Peter F. Kilmartin, Attorney General of the State of Rhode Island v. Joan M. Barbuto, et al.” [Supreme Court No. 2015-195-Appeal. (WC 12-579)], the court upheld the RI Superior Court’s denying the Attorney General’s request for declaratory judgement that a 1909 Plat created an incipient dedication of an easement to a disputed part of the beach at Misquamicut. In the RI Superior Court case of Kilmartin v. Barbuto the RI Attorney General Peter F. Kilmartin brought suit against certain homeowners at Misquamicut Beach in the Town of Westerly. At issue was an approximately two-mile long stretch of land bordering the shore of the Atlantic Ocean and extending landward from the sea (Disputed Area). The Attorney General claimed the original owners of the Disputed Area recorded a subdivision (1909 Plat) by which they offered an easement across the Disputed Area to the general public. The Attorney General sought declaratory judgment from the Court to forbid the present homeowners from interfering with the public’s right to use the Disputed Area as a public easement to the shore. The Court’s task was to determine whether the 1909 Plat effectively offered the Disputed Area to the public through dedication as an easement. The Court denied the Attorney General’s request for declaratory judgement, concluding that the 1909 Plat did not create an incipient dedication of an easement across the Disputed Area to the shore. At the time of this writing the Attorney General’s office had announced that it will appeal the Court’s judgment. (Adapted in part from RI Superior Court case C.A.No. WB-12-0579, filed 9/4/14). That appeal occurred on June 15, 2016 when the Attorney General filed a brief appealing the judgement by the Superior Court to the Rhode Island Supreme Court (C.A. NO.: SU-15-0195; Appeal of C.A. NO.: WC 12-0579).

**13)** The CRMC uniquely addressed public access to the shore in Narragansett Bay’s urban core when it promulgated the Urban Coastal Greenway regulations (UCG) under the Metro Bay SAMP. The UCG offers development projects the option to create an easement for public access to the shore as compensation for allowing a more compact vegetated coastal buffer zone than required by Section 150 (Coastal Buffer Zones) of the Red Book. The goal of the public access option is to create the Urban Coastal Greenway – a public access pathway along the shores of Cranston, Providence, Pawtucket, and East Providence – that includes vehicular parking and arterial public access from the street side of a coastal parcel to the shore. While the UCG clearly provides a significant public benefit, the allowance of a compact buffer zone increases the useable area of an urban coastal parcel; such parcels typically cannot meet the buffer zone requirements of Section 150 (which target more rural parts of the state) and remain economically viable. A more recent addition to CRMC’s public access initiatives is the establishment of Coastal Greenways via the Aquidneck Island SAMP. Modeled on the UCG approach of establishing a continuous public access pathway along the shore on a project-by-project basis, the first such link of a Coastal Greenway is in place as shown on the table below. To date, the following projects have contributed to the establishment of the Urban Coastal Greenway and the Coastal Greenway:

<b>Project</b>	<b>Municipality</b>	<b>UCG or CG Easement</b>
American Locomotive file # 2007-02-038	Providence	Public path along the Woonasquatucket River, minimum of eight parking spaces, and public access signage. (UCG)
Division Street Hotel file# 2006-08-016	Pawtucket	Public path along the Seekonk River, minimum of eight parking spaces, and public access signage. (UCG)

East Point Development Project file # 2021-06-074	East Providence	Public path along the Seekonk River, public parking spaces and signage, walkways leading to the shoreline public path. (UCG)
Johnson and Wales University file # 2006-07-012	Providence/Cranston	Public access path along Narragansett Bay, public parking spaces and a recreational public access ramp. (UCG)
Kettle Point file # 2013-06-080	East Providence	Public access pathway along the Providence River with public parking provided. (UCG)
Newport Beach Club File # 2011-05-120	Portsmouth	A Coastal Greenway; a public access path by Narragansett Bay with public parking provided.

**14)** The CRMC has developed a project to coordinate with various state agencies to identify and designate public parking for CRMC ROW users per Section 46-23-6(5)(iv) *Rights-of-way*, of its enabling legislation. Two state properties managed by RIDEM will be the first where public parking is established under this initiative. Further detail regarding the number of parking spaces at and their locations within each property will be provided by RIDEM in the near future.

**15)** The CRMC partnered with the DEM to produce *Beaches and Sand Trails of Southern Rhode Island (Regulations and Information Pamphlet)* that addresses the regulation of vehicular traffic on the beaches and sand trails along Rhode Island’s southern shore. Topics include rules for driving on beaches and sand trails, camping in these areas, environmental concerns such as erosion and programs that manage beaches for piping plovers, a migratory shorebird that nests along Rhode Island’s southern shore and is protected by the federal Endangered Species Act. The pamphlet is available free of charge and can be accessed through the CRMC website via the following link: [http://www.crmc.ri.gov/offroadvehicles/BeachesTrails\\_RegsInfo.pdf](http://www.crmc.ri.gov/offroadvehicles/BeachesTrails_RegsInfo.pdf)

**16)** The CRMC has produced pamphlets and signs in seven languages (English, Spanish, Portuguese, Vietnamese, Hmong, Laotian, and Cambodian) which establish a code of conduct while using ROWs. The pamphlet discusses the public’s constitutional privileges to the shore, but it also strongly emphasizes the importance of respecting private property rights in the vicinity of ROWs. The pamphlet identifies littering, trespassing onto private property, and blocking private driveways with illegally parked cars, as primary problems to be avoided by users of ROWs. The CRMC installs the multi-language signs at its Adopt-An-Access sites and the pamphlets are available at no charge in hard copy at the CRMC office in Wakefield.

**17)** The CRMC has published a public access guide as part of a Special Area Management Plan for Greenwich Bay. The public access guide lists CRMC designated ROWs that lead to Greenwich Bay. The inclusion of technical and physical descriptions, locus maps, aerial photographs, and GIS maps which pinpoint the locations of and directions to the ROWs, makes this the most comprehensive and “user-friendly” public access guide the CRMC has produced to date. The guide also identifies other public access sites along Greenwich Bay, including municipal rights-of-ways to the shore and publicly-owned open spaces. The guide is available at the CRMC office in Wakefield at no charge and via the CRMC website at: [http://www.crmc.ri.gov/publicaccess/gb\\_row\\_guide.pdf](http://www.crmc.ri.gov/publicaccess/gb_row_guide.pdf)

**18)** The CRMC continues to distribute its *Coastal Briefing: Public Rights-of-Ways CRMC’s Designation Process* fact sheet which describes the process for designating ROWs, and it’s *Citizen’s Guide to Assisting in the Right-of-Way Designation Process* which was designed for municipal officials and the general public. The *Citizen’s Guide* provides step-by-step information on how to conduct background research to

identify potential ROWs. Both the *Fact Sheet* and *Citizen's Guide* are available via the CRMC website at: <http://www.crmc.ri.gov/publicaccess.html>

19) The CRMC continues to complete and update this annual rights-of-way report which is available to the public at no charge at the CRMC office in Wakefield. As the CRMC designates new public rights-of-way, the report is updated to document the location of these right-of-ways. The report serves as an inventory and planning tool for coastal communities as well as serving a public interest. This report is also available via the CRMC website at: <http://www.crmc.ri.gov/publicaccess.html>

20) The CRMC continues its cooperative efforts with the municipalities to promote the continual process of discovery and designation of new ROWs. CRMC staff continues to update a contact list of municipal officials in Rhode Island's coastal communities, and to initiate periodic contact with these individuals to solicit information on potential new ROWs in each municipality, and to offer assistance regarding ROW issues.

21) The CRMC worked alongside Roger Williams University School of Law Fellows Program to leverage program graduation requirements with CRMC ROW Research Needs. The partnership between Roger Williams University Law Fellows and CRMC proved to be very successful and has resulted in almost one dozen sites being investigated as potential public Rights of Way.

## FUNDING

The lack of funding remains a chronic problem for the rights-of-way program. Historical federal funding for the task of discovering and designating ROWs was established at \$30,000 per fiscal year. However, in response to subsequent budget problems the appropriations specifically earmarked for this task were level funded at \$5,000 per fiscal year, until FY13 when the federal share was eliminated.

The monies must still cover legal, stenographer, travel, advertising, and staff costs. Currently the agency has been able to restore some federal funds to this effort. And most importantly, this funding includes comprehensive legal research, and time-consuming public hearings (the purpose of which is to exhaust evidence), resulting in site designations that span reporting periods.

Therefore, notwithstanding partnerships like the one previously mentioned with the Roger Williams University Law School Fellow program, it is likely that due to further decreases in appropriations, and the resulting decreases in federal monies (a 1:1 match is required with federal funding), it may be necessary for the CRMC to come close to zero-funding its rights-of-way program next fiscal year. As state appropriations have become non-existent for this task, the CRMC is faced with using federal funding to cover operational costs. Further, if one were to take into consideration the monetary cost of trying to purchase those CRMC designated public access areas at current market value, it would easily amount in the millions of dollars. Thus the state has reaped a high rate of return for monies expended on this program. By demonstrating how successful the CRMC's efforts vis-à-vis rights-of-way designations and its impact to the state's quality of life, the Council will attempt to foster partnerships that will allow ROW designations to go forward in spite of funding constraints

## FUTURE ACTIONS

One of the prime objectives of the right-of-ways subcommittee is to continue to seek opportunities to foster partnerships that further the ROW discovery and designation.

Additional state funding will be sought, which will result in additional sites being reviewed, and therefore possibly being designated as public ROWs to the shore.

The subcommittee's task of designating public ROWs to the shore continues to be one of the CRMC's highest action items to ensure the public right-of-access to the coastal waters of Rhode Island.

Respectfully submitted by,

Jeffrey M. Willis, Deputy Director  
Coastal Resources Management Council

on behalf of the Rights-of-Way Subcommittee:

Raymond C. Coia, Chair  
Patricia Reynolds, Vice Chair  
Terrence Gray, DEM Director

TOWN-BY-TOWN ANALYSIS  
OF THE COUNCIL'S ACTIONS REGARDING  
SITE DESIGNATIONS AND PUBLIC RIGHTS-OF-WAY TO THE SHORE

The following represents a town-by-town analysis of the CRMC's actions regarding the review of various sites and their potential designations as public rights-of-way to the shore. This is the official listing of the Council's actions regarding its designation process for public rights-of-way.

Where applicable, the following terms mean:

- Insufficient Evidence: The CRMC reviewed these sites and based on the evidence submitted into the record at the time of the hearing; found that insufficient evidence existed to designate these sites as public rights-of-way to the shore. However, further review may occur for these sites given new evidence.
- Not Resolved: The CRMC previously investigated these sites and made no determination as to whether or not these sites are public rights-of-way to the shore. They are not currently being investigated by the CRMC, however further review may occur for these sites given additional evidence.
- Under Review: Sites which are currently being considered by the subcommittee.
- On Appeal: Decisions of the CRMC which are being challenged through the courts.
